Workers Compensation

Workers Compensation reimagined to exceed today’s workforce demands

Save time and boost efficiency with the eCase Workers Compensation case management application to receive, monitor and process claims quickly and compliantly. Our comprehensive case-management system combines various, fragmented components into a single unified process for successful case resolution.

Easily track a variety of pre-configured workers compensation processes, tailored through configuration, not coding, to meet our customer’s unique workers compensation requirements reducing implementation time and costs.

**eCase Workers Compensation allows organizations to:**

- Efficiently process standard federal workers comp forms for sickness and injury
- Accelerate claims processing times
- Gain full transparency into action history, approvals, document routing and overall processing
- Capture, collaborate and share information
- Enable self-service with digital access points to complete paperwork, submit documentation and send/receive correspondence
- Use dynamic workflows for approvals, reviews and processing
- Generate reports in seconds and view metrics with in depth reporting tools and dashboards
- Set role-based user access for ultimate security and privacy

Workers Compensation can work independently or as part of an integrated suite of applications including Labor Relations, Employee Accommodations, Telework and Benefits Tracking.

- Claim for Compensation
- Injury
- Notice of Occupational Disease
- Notice of Recurrence

**Align, Engage, Empower**

- **Improve Visibility**
  Get greater insight into your workforce with dashboards, reports and data in real-time.
- **Empower HR**
  Achieve better outcomes with data-driven decision making and adaptive workflows.
- **Focus on Real Priorities**
  Easy access to information and clear communication enable better customer service.
- **Promote Engagement**
  External web portals, automated correspondence and status updates encourage self-service and interaction.
- **Unify Processes**
  Connect activities through one unified platform to streamline Workers Compensation across the enterprise.

**FedRAMP Authorized Hosting**
One of the only FedRAMP SaaS authorized HR solution providers.
The eCASE HR® Difference

eCase HR is a full-featured HR framework built with an adaptive case management engine that digitizes and automates essential human resource functions. The suite of applications provide a single, unified solution to managing the employee lifecycle enabling organizations to better align, engage and empower their workforce.

Built on the low-code eCase Platform, the technology puts the power in the hands of HR, not IT. Users can configure changes in the application with an intuitive UI designer – from modifying a workflow to restructuring your process. No custom coding required. This flexibility allows the solution to extend and grow with your organization. As your requirements change, eCase HR changes with it.

AINS® is a leading global provider of cloud-based, adaptive case management solutions. Since 1988, AINS has empowered more than 380 organizations in 45 countries to rethink how they work, develop and deploy new technology. AINS innovative, agile software and services spur digital transformation across the enterprise.
