

eCASE[®]HR

eCase Workers' Compensation can work independently or as part of the integrated eCase HR application suite.

eCase HR is a full-featured HR framework built with an adaptive case management engine that digitizes and automates essential human resource functions. The application suite provides a single, unified solution to managing the employee lifecycle.

Built on the low-code eCase Platform, the technology puts the power in the hands of HR, not IT. Users can configure changes in the application with an intuitive UI designer – from modifying a workflow to restructuring your process. No custom coding required. This flexibility allows the solution to extend and grow with your organization. As your requirements change, eCase HR changes with it.

AINS[®] is a leading global provider of cloud-based digital process automation solutions. Since 1988, AINS has empowered more than 400 organizations in 45 countries to rethink how they work, develop, and deploy transformative technology.
